

SIMO Training System

SIMO is a safety and training system integrated by the manufacturer into their firearms to allow safe and realistic dry-fire training.

SAFETY OF OTHERS	L-T	MOD	MAG	DUTY	SIMO
No NDs when training with system	✓	✓			✓
No NDs if round in the chamber		✓			✓
No NDs until reset to duty status		✓	✓		✓
Unmissable “safe” signal to others	✓				✓
Instructor safety from NDs		✓			✓
SAFETY OF SHOOTER					
No unrealistic training actions		✓		✓	✓
Trains on dangerous malfunctions					✓
Trains on carried firearm		✓	✓	✓	✓
Safe draw and reload practice	✓	✓			✓
Simple return to duty status (no tools)			✓	✓	✓

Key: L-T (Laser Trainer). Examples: SIRT 110, SF-30 Pro
MOD (Modifications). Examples: CoolFire, VirTra
MAG (Magazine). Examples: Smart DryFireMag, TTrigger
DUTY (Duty Firearm): firearm by itself
SIMO: firearm with SIMO Training System

What else SIMO provides:

Safe trigger resetting, audio feedback, realistic malfunction clearing, ammunition discipline, meaningful coaching, easy customization, instructor safety. Works with existing holsters, lights, and sights. Compatible with MantisX and other video/virtual training systems.

Limitations of SIMO:

Not available as an aftermarket kit. Must be built into the manufacturer’s firearm. No recoil system currently.

Bottom line:

SIMO prevents negligent discharges (NDs) in training, and protects against fatal lapses of attention by instructors or trainees. It significantly reduces training costs, safety risks, and litigation risks for individuals and organizations.

Don’t see it in your manufacturer’s catalog? Contact them and tell them to start integrating it now!
